OLYMPIC ANCHORS

THE GOLD STANDARD

Quick®
Nautical Equipment

QuickGroup

Quick Group, international leader in the nautical equipment sector, operates worldwide in more than 110 countries.

From the beginning, the Group has been at the forefront of the times, and today it boasts an ambitious project of technological innovation and excellence hub for the nautical market.

Quick Group has more than 420 employees and extends its logistics and production capacity over 40,000 square meters between Italy, with its headquarters in Ravenna and three production sites, and abroad, with logistics and commercial sites in the United States and in the UK. The Group, led by Michele Marzucco as CEO and Founder, has been working in partnership since 2022 with Fondo Italiano d'Investimento SGR and Armònia SGR

Quick Nautical Equipment, part of Quick Group, is a historic brand that laid the foundation for some of the most essential marine products on the market today. From the very beginning, Quick Nautical Equipment set the standard in the industry, establishing features that have since become industry benchmarks as it quickly became known for its exceptional reliability and groundbreaking innovations.

Quick Nautical Equipment encompasses a wide range of products that are essential for any boat, including anchors, windlasses, battery chargers and inverters, bow thrusters, water heaters, and electronic controls. Each product is crafted with precision and engineered to provide unmatched performance and durability, ensuring that time on the water is as smooth and safe as possible.

Over the years, new technologies have been consistently introduced to meet the evolving needs of the marine industry. The ongoing commitment to excellence ensures that Quick Nautical Equipment remains at the forefront of marine innovation, delivering products that not only stand the test of time but also enhance the overall sea experience.

WE SET THE GOLD STA

If you think you have the best, think twice.

NDARD

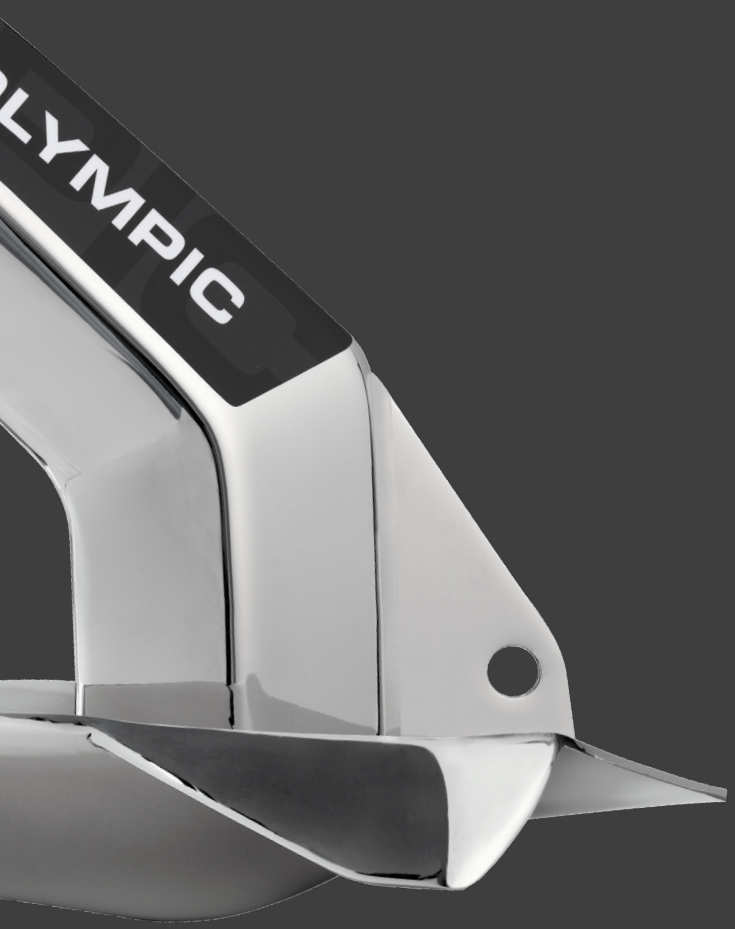
THE GOLD STANDARD - AISI 316L - MADE IN ITALY
Quick
Nautical Equipment

FEATURES

100%
Made in Italy

Optimized design
for enhanced
penetration capacity

SHHP classification
by RINA



Universal compatibility

Made of AISI 316L stainless steel

Optimal positioning

OPTIMIZED DESIGN

For Enhanced Penetration Capacity

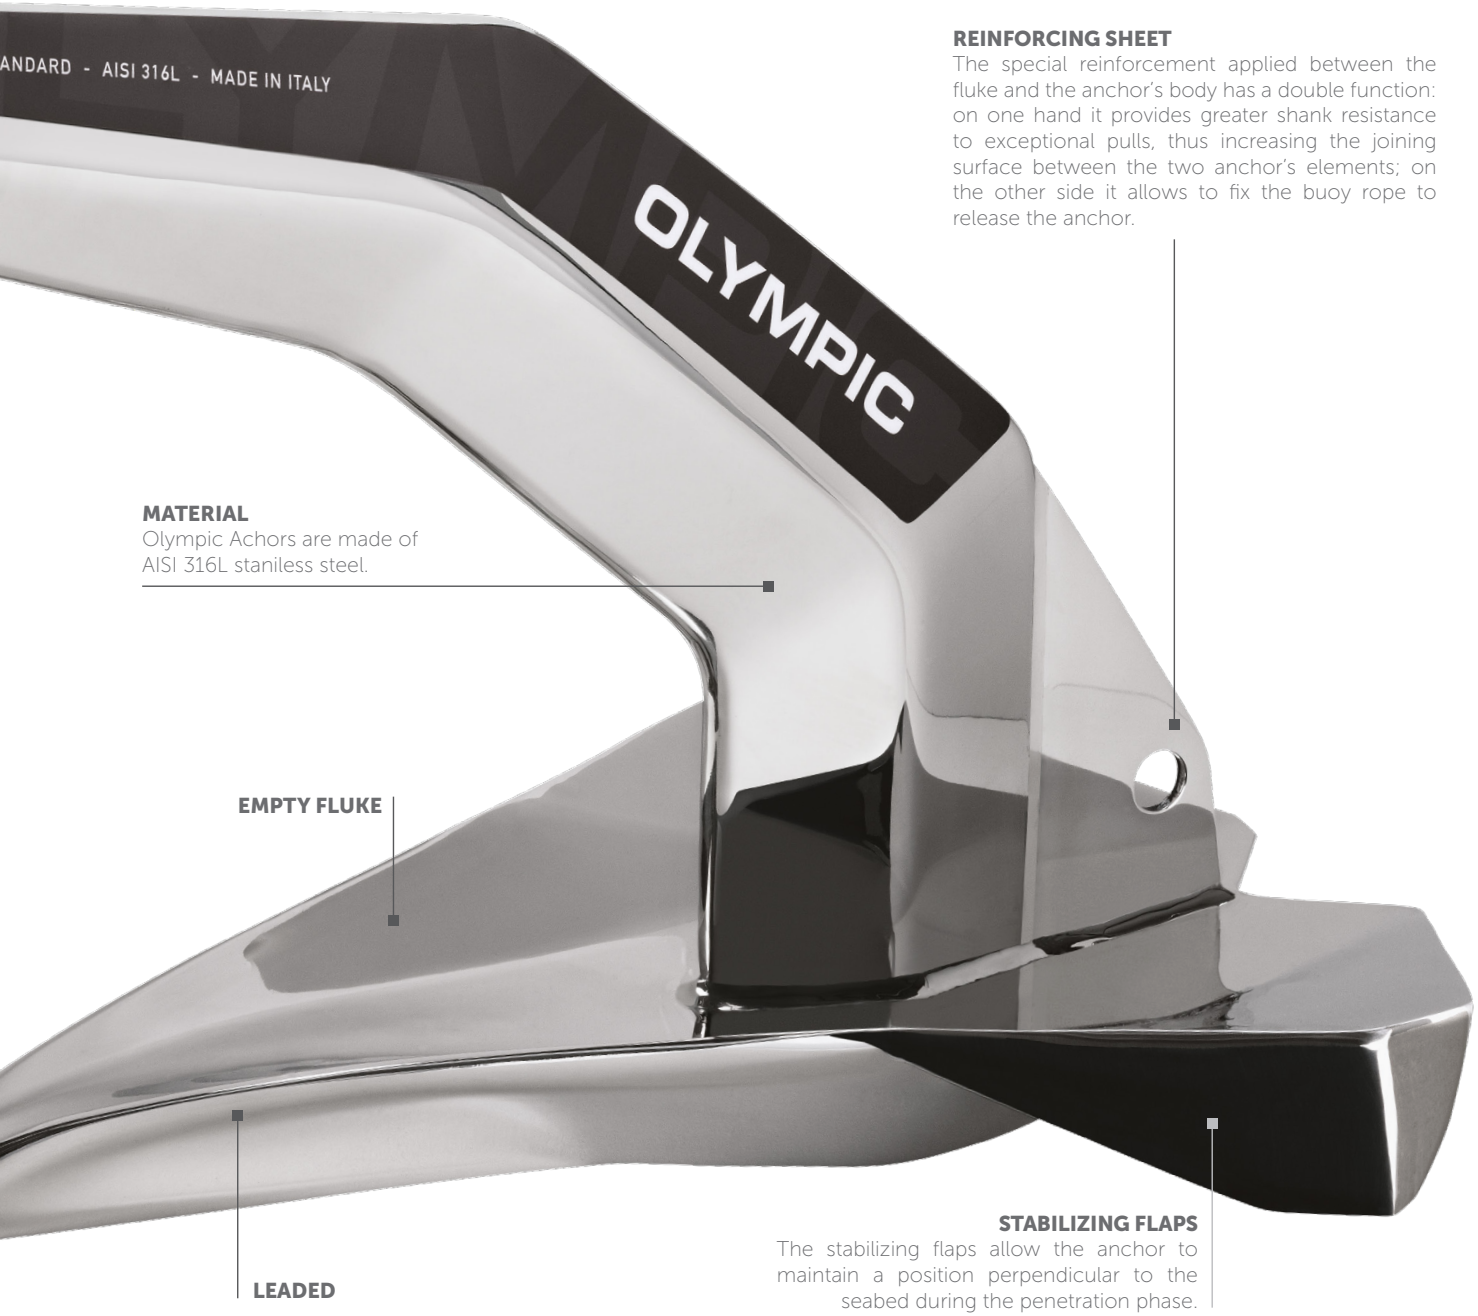
Olympic Anchors shape and size are proportioned in order to have a greater quantity of lead on the front of the fluke. This weight distribution choice allows for (in a compact size) a center of gravity more projected towards the tip, thus increasing its penetrating capacity.

The process of sheet metal forming, subsequently welded, was the manufacturing process chosen for these anchors.
This allows a high strength/mass ratio, thus guaranteeing weight distribution optimization. Furthermore, the cavities generated and the air trapped in them, create a floating effect which results in a correct positioning of the anchor on the seabed.

Thanks to the compact shank, Olympic Anchors will adapt to most bow rollers currently on the market.
Olympic Anchors are available in polished or satin finish.

ADAPTABILITY

TIP
The tip develops in two circular surfaces, designed to facilitate the sliding of the impacted material during the seabed penetration process.



REINFORCING SHEET
The special reinforcement applied between the fluke and the anchor's body has a double function: on one hand it provides greater shank resistance to exceptional pulls, thus increasing the joining surface between the two anchor's elements; on the other side it allows to fix the buoy rope to release the anchor.

MATERIAL
Olympic Achors are made of AISI 316L staniless steel.

EMPTY FLUKE

LEADED

STABILIZING FLAPS
The stabilizing flaps allow the anchor to maintain a position perpendicular to the seabed during the penetration phase.

MADE IN ITALY

The new Olympic Anchors have been developed through detailed product engineering and production process carried out inside the company.

All the suppliers are Italian and many are based close to the production facility, giving a head start in reducing supply chain impact. Coupled with this is a lean logic production approach, which reduces waste and other losses and therefore generates value for customers, working with partners and suppliers to shorten and improve the up and downstream supply chains.

OLYMPIC
THE GOLD STANDARD - AISI 316L - MADE IN ITALY
Quick

SUPER HIGH HOLDING POWER

The Olympic Anchors series has obtained the SHHP classification by RINA.
This certification testifies the great anchoring efficiency of this series which has a holding power at least double of an HHP anchor.
This feature allows the use of lighter anchors with the possibility to reduce the weight on the boat, while maintaining an excellent holding power. Due to their high holding efficiency, lighter anchors can be used, reducing the overall weight on the boat without compromising safety.

OLYMPIC SWIVEL

The perfect match

The **patent-pending** auto over turning system of Olympic anchor-swivel, obtained thanks to the combination between the eyelet shape, welded on the shank extremity, and the circular elements of the swivel, allow the anchor to overturn, thus positioning on the correct side on the bow roller.

All Olympic swivels are made of AISI 630, which is a material extremely resistant to marine corrosion and which – unlike AISI 316 – boasts an incomparable mechanical strength.

The complete Olympic swivel then undergoes a special mirror polishing process, which allows to both have an aesthetically pleasing product and reduce the friction generated by impurities.

Olympic swivels are available in polished or satin finish.

OS 8-10 OS 10-20 OS 13-34 OS 14-60 OS 16-100

Strength and Performance
All swivel components are obtained through the CNC machining of AISI 630 bars, an extremely resistant stainless steel.

Easy installation
The coupling between swivel and pins is extremely simple.

Interchangeability
The swivel can be installed on several anchors currently on the market.

Patent-pending auto overturning
The system is guaranteed by the coupling between Olympic Anchors and swivels.

COMMITMENT TO SUSTAINABILITY

Quick Nautical Equipment brand also contributes every day to the shared mission of the Group with the goal of building a zero-waste world.

The packaging for Olympic Anchors is made from 100% recycled material and is part of a process of re-engineering all packaging in partnership with certified suppliers, both in terms of the materials used and the supply chain.

QUICK
WE ARE COMMITTED
TO BUILD A
ZERO-WASTE
FUTURE
Our commitment begins with small actions, and our packaging is a perfect example of our mission. We have embarked on a re-engineering process of all our packaging in collaboration with certified partners to minimize the environmental impact of our products. This includes using paper and cardboard sourced from sustainably managed forests.
This commitment stems from our responsibility towards the environment and the sea, which for us is not just a destination but our home, our passion and our future.
Please use this packaging consciously, promoting its reuse and responsible recycling.
